

# Q1 Please rate the following: How well did this session meet the overall goal of understanding the State of Primary Care in Rhode Island?

Answered: 33 Skipped: 0

	1, LOW	2	3	4	5, HIGH	TOTAL	WEIGHTED AVERAGE
.	0.00%	3.03%	6.06%	48.48%	42.42%	33	4.30
	0	1	2	16	14		

#	COMMENTS	DATE
1	Nice meeting overall, very little new information learned.	4/17/2018 2:00 PM
2	all from provider and insurance point of view - How about some actual patient point of view ?	4/11/2018 10:23 AM
3	More discussion, understanding of the day to day workflow challenges in the primary care office setting.	4/10/2018 5:35 PM
4	Very informative about the status of primary care in RI.	4/10/2018 2:10 PM
5	The content felt a little unfocused. I think some more topical focus would have made the experience more edifying.	4/10/2018 2:03 PM
6	It was too focused on the state of primary care in CTC practices	4/10/2018 1:50 PM

## Q2 Please rate the following speakers: "Welcome and CTC-RI Program Updates" Opening Remarks: Debra Hurwitz, MBA, BSN, RN

1	very " all about the pcp " - which makes sense , ... he is a pcp .	4/11/2018 10:23 AM
2	It was interesting to hear about booking by acuity. A follow up would be nice, how is it going, how do they rate the patient acuity, etc	4/10/2018 3:51 PM

## Q6 Panelist: Matthew Roman, LICSW, MBA, Chief Operating Officer, Thundermist

1	great event	4/17/2018 8:32 PM

## Q8 Feedback and suggestions for future topics of interest

Answered: 12 Skipped: 21

#	RESPONSES	DATE
1	Good program turnout. Those of us living it probably didn't need to be there, except that it is important to show to the others that there are people living through it, challenges and pluses both. I'll be interested to hear other's feedback.	4/23/2018 12:49 PM
2	Need more seminars with updates down the road.	4/23/2018 9:00 AM
3	usage of 3D PRINTING FOR REPLACEMENT OF HUMAN ORGANS	4/20/2018 3:41 PM
4	Would suggest more interaction between the audience (get them engaged in small groups); more on workforce and conditions of work	4/17/2018 8:32 PM
5	I think the panel format was not effective. Specific topics may have been more valuable, such as presentations on how practices have changed through participation in transformation initiatives and what work remains to be done.	4/17/2018 1:20 PM
6	Integration of non-pharma alternatives for pain and dysfunction: Acupuncture, Chiropractic, Massage Therapy, etc.	4/17/2018 9:53 AM
7	I think some real patients from different backgrounds would be helpful - from north scituate and central falls , young , elderly , commercial and Medicaid ... working and disabled ... at the end of the day - We are all patients !	4/11/2018 10:23 AM
8	Good event. Thank you for facilitating. Pedi /Medicaid ACOs More re Outreach Teams	4/10/2018 10:17 PM
9	Integration of pharmacists into physician practices to reduce physician burnout and enhance patient education and medication adherence.	4/10/2018 4:41 PM
10	- digital health and primary care - direct contracting by providers to employers	4/10/2018 2:10 PM
11	Promising models of integrating behavioral health and social determinants into primary care, and how value-based payments can support and sustain these models	4/10/2018 2:03 PM
12	I expected that the conversation would include other definitions of primary care outside of clinical medical practice. Also, too much emphasis on physicians in primary care, add in nursing, NP, CNS, other behavioral and oral health practitioners	4/10/2018 1:50 PM
