PLAN TO KEEP OUR CHILD SAFE WHILE AT HOME

- 1. Keep over the counter (e.g., acetaminophen, ibuprofen) and/or prescription medicines in a locked cabinet or box.
- 2. If you have firearms in the home, consider removing them. If you can't, store firearms in a secure place, use gun safety locks, and store ammunition securely and separately.
- 3. Pay attention to your child's moods and behaviors. If you notice significant changes, talk to your child and contact your pediatrician, family physician, and/or behavioral health provider.

4		

6.

Use a lock bag or locked cabinet to securely store all over the counter and prescription medicines. Drop off unused or expired medicines at a local drop box site. Scan the QR code or visit <u>riprevention.org/campaigns</u> to order a free medicine lock bag or to find a drop box location near you.
