

Do you live in  
Providence, Pawtucket,  
Central Falls or Woonsocket?

---

Do you rent your home or  
apartment?

---

Do you think your  
housing conditions are making  
your child's asthma worse?

Breathe Easy at Home  
may be able to help.

---

**Housing conditions that contribute to breathing issues** include peeling paint, mold, dust mites, secondhand smoke, pests (cockroaches and other insects, rodents), pets, and other animals. If your home environment is affected by these conditions, you may benefit from participating in the **BREATHE EASY AT HOME (BEAH)** program.

**THE BREATHE EASY AT HOME (BEAH)** program gives you, healthcare providers, your city or town, the Rhode Island Department of Health, and your landlord a chance to work together to improve living conditions in your home. The changes that are made will reduce exposure to asthma triggers and help children with asthma breathe easier in your home.

Your healthcare provider will ask you to sign a consent form, and will refer you to BEAH. An inspector from your city/town housing office will call you to make an appointment to visit your home.

The next steps are:

- An inspection is done on the property, usually within 5 days of the referral.
- If violations are found, notification is posted on the property and is mailed (regular and certified mail) to the occupants and the owner or person responsible for the property.
- The owner or person responsible for the property is given between 24 hours and 30 days for the correction of violations (depending on violation type).
- A follow-up inspection is done after the time period allowed for the correction of violations ends.
- The case is closed when all violations are corrected.

# FACTS ABOUT THE BREATHE EASY AT HOME INSPECTION

- The city/town housing inspector will conduct all inspections.
- Inspections are scheduled on days and at times that are convenient for you.
- The owner or person responsible for the property does not have to be present at inspections.
- Inspectors will also look for housing code violations that are not related to asthma.
- The owner or person responsible for the property has the right to appeal violations within 10 days of being notified of these violations.
- You (and the owner or person responsible for the property) will receive notification about follow-up inspections.
- If housing code violations are found, the healthcare provider who made the original referral will be routinely updated about the process of fixing these violations.
- You are protected from retaliation by your landlord for participating in BEAH. Landlord retaliation is illegal. Information about tenant rights is available at:

## **RHODE ISLAND CENTER FOR JUSTICE**

1 Empire Plaza, Suite 410  
Providence, RI 02903
