

# **Call for Applications:**

# <u>CTC/PCMH Kids Pilot Primary Care Telehealth Learning Collaborative Opportunity</u> <u>"Using Technology to Improve Care for Patients with Chronic Conditions"</u>

Care Transformation Collaborative of Rhode Island (CTC-RI)/PCMH Kids is pleased to offer up to twenty (20) primary care practices the opportunity to apply for funding for a twelve (12) month learning collaborative to test the use of telehealth technology to improve care for patients with a selected chronic condition<sup>1</sup>. Practices will be provided with infrastructure and incentive funding payments (\$22,000.00 per practice site), practice facilitation technical support, Northeast Telehealth Resource Center content expert support, and quarterly "best practice sharing" peer learning services. Outlined below is the "CTC/PCMH Kids Pilot Primary Care Telehealth Learning Collaborative Call for Applications" which has been financed by UnitedHealthcare and authorized CARES Act funding.

#### **Introduction and Intent:**

COVID-19 has created a need for primary care practices to expand the use of technology to help people better manage their chronic conditions and enable practices to further physical distancing measures, reduce unnecessary in-person visits, and thereby mitigate the spread of COVID-19. The project will provide training and infrastructure payments to primary care practice teams to support their delivery of services through telemedicine modalities. The pilot provides primary care practice teams with the ability to implement a Performance Improvement and Telehealth Patient Care Support Plan and learn lessons that can be applied to a larger group of patients or spread to other primary care practices. Practices may select medical or behavioral health<sup>2</sup> chronic conditions such as but not limited to: hypertension, diabetes, congestive heart failure, chronic kidney disease, asthma, obesity, chronic pain, depression, obesity, anxiety, ADHD. Practices may select technology such as but not limited to: medical apps, secure data management portal and patient messaging, text messaging, wearable activity devises, remote monitoring.

During the learning collaborative, primary care practice team will identify:

- A patient population of focus for management of one chronic disease condition;
- Goals and metrics for success and tests for change;
- A telehealth technology solution that could address potential patient and practice need;

During the learning collaborative, the primary care practice team will be responsible for:

- Developing and implementing a Performance Improvement Plan including workflow (roles/responsibilities), training needs (staff/patients/parents/caregivers) and business requirements;
- identifying patients/parents/caregivers who need additional assistance with using technology and developing/implementing a plan to address technology needs using existing staff and /or community linkages who could provide "hands on" assistance such as Community Health Team, community health worker, family home visiting program, CEDAR).
  - Reporting outcomes including measures of success, barriers and solutions.
- **Objectives:** To provide:
- Primary care practices with financial and technical support that will enable them to test, measure and
  evaluate the impact of using telehealth technology to improve management of chronic conditions for
  practice identified population of focus and to be positioned to spread learning to a larger number of
  patients and/or to other practice sites;
- Patients with chronic illnesses a telehealth technology option to improve their management of chronic conditions in the midst of COVID-19;
- Patients with telehealth learning needs with "hands on" or tailored support solution.

## Who can apply:

- Pediatric, Family Medicine, Adult Primary Care practice teams (including Federally Qualified Health Centers;
- Practices that met the Rhode Island Patient Centered Medical Home requirements:

1 CDC broadly defines chronic diseases as conditions that last 1 year or more and require ongoing medical attention or limit activities of daily living or both.

# Priority with be given to practices that:

- Are part of a system of care;
- Identify a team approach to the management of chronic conditions;
- Practices that participated in the CTC Primary Care Telehealth Practice and Patient needs assessment surveys;
- Have a practice location with high COVID-19 rates;

# Funding Details (\$22,000 per practice site)

CTC-RI/PCMH Kids seeks to establish a one-year funding opportunity for primary care practices (child, family or adult) which includes:

Infrastructure Payment: \$17,000: Selected primary care practices will be eligible to receive \$17,000 infrastructure payment with the execution of the Participative Agreement (due 12/18/20); Infrastructure payment can be used for testing and using telehealth technology options (such as remote monitoring solutions, secure data management portal and patient messaging mobile health application etc.). Infrastructure and incentive payments can be used to offset the costs associated with implementing and measuring effectiveness of using a telehealth technology option to assist patients with management of chronic conditions. Payments could be used for such things but not limited to purchase of "hot spot "cards, blue tooth medical equipment, staff training and participation in the learning collaborative.

<u>Incentive Payment (\$5,000.00)</u> Incentive payment will be made to practices that successfully complete service delivery requirements (1/31/22)

#### **Benefits:**

- Improve access to care and patient experience for patients who have physical distancing requirements during COVID-19;
- Improve clinical outcomes for patients with chronic conditions;
- Improve engagement of under-served patients experiencing barriers to care and health disparities with respect to using technology to improve chronic illness outcomes;
- Improve access to peer learning opportunities as well as customized quality improvement and content expert technology support.

#### **Application Process:**

- Primary care practice team submits completed application by 11/30/20 via survey monkey link: https://www.surveymonkey.com/r/GG8YDQJ (see Appendix A for "Call for Applications" word document);
- Submits a Practice Cover letter by 11/30/20 via email (<a href="mailto:ctctelehealth@ctc-ri.org">ctctelehealth@ctc-ri.org</a>) that indicates practice commitment and capacity for meeting project expectations (see Appendix B for template);
- Submits Letter of Support by 11/30/20 via email (<u>ctctelehealth@ctc-ri.org</u>) if part of a system of care i.e. accountable care organization/accountable entity (Please see Appendix C for system of care template);

See Selection Committee Policy and Procedure and Scoring Process (see Appendix D).

# **Practice Team 12 Month Activities:**

- Attend quarterly peer learning collaborative meetings, webinars that are relevant to selected chronic condition/technology;
- Attend monthly meetings with practice facilitator,

### Start-Up (1-4 months January-April 2021):

Objectives: To Identify needs/ feasibility and plan for action;

Together with practice facilitator, practice team members are responsible for:

- Using data and clinical experience to define the practice and patient needs the team hopes to address via a telehealth program;
- Identifying patients with chronic care needs who could benefit from better care management using team approach and telehealth technology to improve outcomes;
- Completing SMART goal to define success, goals and metrics

- Participating in webinars and other learning opportunities to identify potential telehealth applications and approaches;
- Identifying technology option that could be used to support patients with selected chronic condition and potential clinical-community partnership opportunity;
- Identifying patients who will utilize the technology option based on risk;
- Identifying patients who may need additional support with using telehealth technology;
- Identifying potential strategies/partnerships that could be used to assist patients/parents/caregivers that need assistance with using telehealth technology to improve management of chronic conditions;
- Identifying an initial conservative estimate of the added costs for the program beyond clinical provider time and creating an initial business plan;
- Submitting a Performance Improvement and Patient Support Plan (P-D-S-A) which includes baseline data, technology, and training plan for staff and patients/parents/caregiver's patient support plan.

# Practice Team Activities Implementation Phase (May-December 2021)

<u>Objective:</u> Implement, measure and refine Performance Improvement and Patient Support Plan.

Together with practice facilitator, practice team members are responsible for:

- Developing and testing workflows;
- Developing and testing staff and patient training materials;
- Implementing a Telehealth Performance Improvement and Patient Support Plan with selected patients;
- Implementing adjustments based on data and feedback from patients, staff and community partner (as applicable);
- Obtaining input from patient/parent/caregiver based on test of change and outcomes and evaluation results;
- Updating and submitting a P-D-S-A with updated performance information;
- Implementing recommendations and measuring effectiveness;
- Updating and submitting a P-D-S-A storyboard including evaluation results, sustainability plan and potential for spread to other practices.

CTC-RI/PCMH Kids sends practice incentive payment (\$5,000.00) with verification of practice meeting service delivery requirements (1/31/22);

# **Timeline for Selection Process:**

Step	Activity	Date
1	Conference call with interested parties to answer any questions.	Friday 11/6/20 (12
	Call-in number:	noon)

5	Notification to selected practices with request for practice to execute a Telehealth	12/11/20
	Participative Agreement	
6	Practice responsible for returning executed Telehealth Participative Agreement to	12/18/20
	CTC-RI	
7	Orientation for newly selected practices (TBD)	

# **Application Checklist**

Check if complete	Item
	1. <u>Completed Application form</u> submitted via survey monkey link:
	https://www.surveymonkey.com/r/GG8YDQJ
	(Please Appendix A for word version of application))
	2. <u>Practice cover letter</u> indicating the practice's commitment and acceptance of the
	conditions stated in the application, signed by all members of the quality improvement
	team and by a practice leadership representative.
	(Please see Appendix B for template)
	3. If applicable, a system of care (i.e. accountable care organization or accountable
	entity) cover letter indicating the level of support provided for this initiative.
	(Please see Appendix C for template)

Completed application packages must be received via survey monkey link by 5:00 PM on Monday 11/30/20 Completed Practice Cover Letter and System of Care Letter of Support must be received electronically <a href="mailto:ctctelehealth@ctc-ri.org">ctctelehealth@ctc-ri.org</a> by 11/30/20.

For questions, contact: <a href="mailto:ctctelehealth@ctc-ri.org">ctctelehealth@ctc-ri.org</a>

CTC/PCMH Kids Pilot Primary Care Learning Collaborative Opportunity
"Using Technology to Improve Care for Patients with Chronic Conditions"

Integrating a telehealth delivery solution into a practice/organization takes time. Questions are intended to assist practices with the planning and implementation process. Practices can use comment section to provide more detail on practice's plan and capacity to develop, test and evaluate use of technology to improve outcomes for patients with chronic conditions

	Yes	No	N/A	Comment
Practice/Organizational Readiness and Capacity: Has there been a	liscussio	n withir	n your p	ractice/organization
regarding				
Anticipated patient needs for using technology to better manage				
their chronic illness?				
Provider needs that could be addressed using technology to				
better manage patients who have chronic conditions?				
Identifying a population of interest? <b>Use comment section</b> to				
identify: adult, pediatric, geriatric?				
Identifying a chronic condition that you would like to improve				
using technology? (Use comment section to identify condition)				
Identifying cost/benefit analysis for using telehealth technology				
to better manage patients with chronic conditions?				
Identifying a telehealth technology/platform you would like to				
use to improve patient's management of chronic condition?( (Use				
comment section to identify technology)				
If your electronic health record has a technology solution that				
could be used for monitoring patient conditions?				
If your practice has sufficient internet bandwidth support where				
you will be providing services?				
Equipment/platform Indicate if your practice is currently using virt	ual care			
Live video (Use comment section to identify platform you are				
using )				
Store and forward (Use comment section to provide detail)				
Remote patient monitoring (Use comment section to identify				
platform)				
Secure data management portal and patient messaging(Use				
comment section to identify system )				
Mobile Medication App ((Use comment section to indicate type				
and for what condition(s)				
Hardware Indicate if your patients are using equipment in their ho	mes to re	eport cli	inical inf	formation? Use

Using medical equipment				
Using hardware equipment				
Using technology				
Practice/Organization capacity to provide patients/families/care	givers wi	th "han	ds on"	assistance Indicate if
your practice/organization has access to:				
Internal staff that could assist patients that need "hands on"				
support? (Use comment section to indicate who)				
A community organization that you could use to assist patients				
who might need "hands on" assistance (i.e. Community health				
team, family home visiting program, CEDAR)?				

# **Questions:**

Please provide a response to each question (limit responses to a maximum of 300 words per question)

1.	The goal of this CTC-RI/PCMH Kids opportunity is to provide primary care practices with financial and technical support that will enable your practice to test the impact of using technology to improve management of chronic condition for practice identified population of focus.  a. What are your organization/practice goals for participating in this program?  b. What patients with chronic conditions would you like to assist?  c. What telehealth technology are you considering?  d. How do you anticipate using pilot financial support to meet your goals?
2.	<ul> <li>One of the qualities of successful transformation initiatives is strong provider and/or organizational leadership with commitment to practice transformation and broad support from practice team.</li> <li>a. Please describe the provider, NCM and top practice/organizational leadership commitment to population management of chronic conditions using technology?</li> <li>b. Please identity the qualifications of the person who will be designated at project manager for this project</li> <li>c. What would the largest barriers in your practice in moving forward with this pilot program and how would practice/organization address these barriers?</li> </ul>
3.	What are the measure of success for your practice (improved clinical outcomes, patient safety during COVID-19, patient/staff satisfaction, cost effectiveness)? What are the top three areas of assistance your practice needs help with?
4.	What support do you envision your patients will need? How might your practice provide support either by using internal staff or through a community partnership?

**Email** 

#### Appendix D

## Selection Committee Policy and Procedure (2020) and Review Process

CTC-RI Selection Committee Policy and Procedure (2020)

The following reflects CTC's policy and procedure for application review:

#### **Conflict of interest:**

Reviewers must disclose any potential conflict of interest related to a specific applicant. A conflict of interest is defined as a real or potential monetary benefit or having an organizational affiliation with the applicant. The Selection Committee will discuss the potential conflicts of interest and make a determination of whether a conflict of interest exists. If so, the reviewer must recuse themselves from the review of that application.

# **Selection Committee Group Process for Review of Total Scores:**

The Selection Committee will convene in December 2020, when reviewers will present and discuss the rationale for scoring. The group will then discuss the ratings to reach consensus on application scoring. Final scores will be entered into a spread sheet, totaled and divided by the number of scores to reach a mean score for each criterion and an overall total score for the application. *The Selection Committee reserves the right to interview applicants if further review is warranted.* 

#### **Review Criteria:**

All reviewers will read and score each application independently using the scoring form and criteria established by the CTC Selection Committee. Reviewers will submit their scores to CTC Management by December 9<sup>th.</sup> CTC-RI Management will compile all scores into one table per application. <u>Questions</u>: A total of 10 points is possible for each question. 2 points if question answered; an additional 2-3 points if response demonstrated organizational interest/commitment and moderate degree of readiness; additional 4-5 points for above average response suggesting that the practice has high degree of readiness, has begun telehealth work and is making progress towards using telehealth technology to assist patients with chronic conditions. The maximum number of points is 71.

In the event of a tie, the following criteria will be used:

- 1. Completion of application-submitted on time and complete;
- 2. Number of Medicaid members-we desire a balance in population served;
- 3. Practice location is in an area with high COVID-19 rates;
- 4. Practice is a member of a System of Care;
- 5. Practice identifies a team implementation approach
- 6. Practice participated in CTC-RI Practice/Patient Needs Assessment
