Compliance to Treatment Regime: Patient and mother are compliant to treatment and doctor's orders

Barriers to Care: Insurance, getting proper medications, Home care Nurse hours.

Medical Neighborhood Needs (who would you collaborate with regarding patient care needs): Insurance companies, and Home care (Bayada)

What is the Plan to Address Identified Concerns?

1. How Would You Address Concerns Identified:
 - a. Immediate Plan
 - i. What is your immediate plan for this patient?
 - contact Bayada to notify them of the number of recommended hours as per Boston Children's Hospital
 - contact insurance company to approve number of hours
 - Help patient's mother to have at home deliveries for medical supplies
 - Appeal medications denial by medical Insurance.
 - a. What Patient Education will you provide?

- Parent is well informed and asks necessary questions on her own
- b. What are three signs/symptoms a patient should report to PCP/CM as soon as possible?
 1. Missed at home care appt.
 2. Respiratory distress
 3. Any possible acute infections / illnesses
- b. Long Term Plan
 - i. What are your long term plans for this patient?
 - Remain in communication with patient and his family
 - Patient must continue to follow-up with PCP and specialists
 - Follow-up with home care services at Bayada

Conclusion:

Joey is a ray of sunshine and even at his worst still manages to smile. He will always need medical care. Luckily his mother is very compliant and always willing to follow the doctors recommendations. As CC, we will continue to provide Joey and his family with whatever they need, including advocating for home services etc. .
