

RI Early Intervention is OPEN for Referrals

Early Intervention (EI) is a program designed to help families support the growth and development of their infants and toddlers, birth through 3 when...

- There is a question of delay in any area of development,
- The child's daily functioning is impacted by environment, behavior, self-regulation, etc. and is not what might be expected for a same aged child, and/or
- The child has a diagnosed condition known to cause developmental delay.

Have the parents voiced concern about their child's development?
Has the child encountered adverse childhood experiences?
Does the child present with behavioral concerns?

Referring a child to EI for evaluation and assessment is always a good idea

Shortly after the onset of COVID19, EI providers were up and running, using virtual means (tele-health) to support children and their families.

EI professionals continue to work with families to develop new strategies, problem solve and provide additional supports.

To make a referral, consult the provider list provided on the back of this sheet. Remember to send a release of information, signed by parent, so coordination of care can happen right away.

Have a question or need more information? Contact RIPIN (RI Parent Information Network) at (401) 270-0101.
