WHAT IS THE RHODE ISLAND MEDICAL HOME PORTAL?

A one-stop shop to help families and professionals caring for children and youth with special needs

in ri.medicalhomeportal.org

About the Portal

The Medical Home Portal is a unique source of reliable information about children and youth with special health care needs (CYSHCN), offering a "one-stop shop" for their:

Partnering with the Portal

The Medical Home Portal also partners with five other states to offer their residents information about local community and professional service providers, found in the Services Directory tab and integrated into the

What is Medical Home?

The Medical Home approach to caring for children focuses on the patient, his/her family, and their community and aims to improve outcomes related to health, relationships, education, and abilities...

MISSION

MCH Priorities for 2020-2024

Ensure effective care coordination for children and youth with special healthcare needs

Initial Strategies:

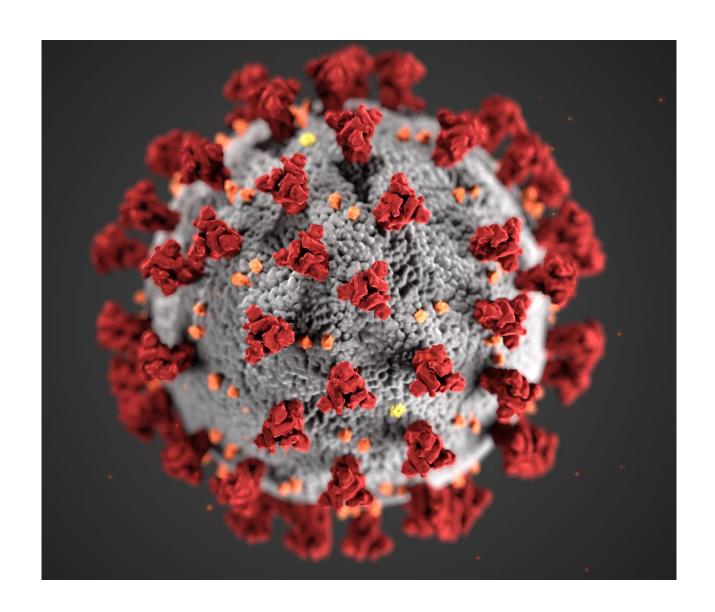

- Promote Patient Centered Medical Homes for CSHCN.
- Promote a web-based application to address effective care coordination in the Medical Home Portal.

SUGGEST OPTIONS

Need a Brochure or Magnet?

The Medical Home Portal is an online resource for Rhode Island families, healthcare providers, and caregivers. It provides reliable information to help you care and advocate for children and youth with special healthcare needs.

To access the portal, visit: https://ri.medicalhomeportal.org

For more information, visit https://ri.medicalhomeportal.org or call 401-222-5960 / RI Relay 711.

A resource for families and professionals caring for children and youth with special healthcare needs

Diagnoses and Conditions

Find information on a wide range of conditions, including:

- Asthma
- Attention Deficit Hyperactivity Disorder (ADHD)
- Anxiety Disorders
- Autism Spectrum Disorder
- Childhood Obesity
- Depression
- Down Syndrome
- Hearing Loss
- Seizures and Epilepsy
- Spina Bifida
 and many more

Rhode Island Services Directory

Find contact information for local service providers or create and share your own lists.

For Parents and Families

Raising children is rewarding, but also challenging. When your child has special healthcare needs, this job can feel even more demanding. The Rhode Island Medical Home Portal is here to help!

Get Resources

The Portal provides resources that can help you become a more effective partner in your loved one's care. Learn more about:

- Early childhood services
- Education and schools
- Navigating transitions
- Financing medical needs
- Finding a supportive community
- Letters of medical necessity
- Understanding health insurance and Medicaid, including the Katie Beckett program and much more!

Build a Care Notebook

A Care Notebook can help you keep track of your child's care and improve communication with your child's care team. Find forms and tips for building a Care Notebook in the Parents and Families section of the Medical Home Portal.

For Professionals

The Medical Home Portal provides information, tools, and resources to help primary care providers, care coordinators, Community Health Workers, and other healthcare professionals:

- Improve care and outcomes for children and youth with special healthcare needs.
- Provide patient and family-centered care.
- Connect families to information and additional resources in the community.

Find up-to-date resources such as:

- Best practice guidelines and tools
- National diagnoses prevalence list
- Newborn disorders and screening information
- Rhode Island pediatric specialists
- Links to clinical trials
- · Information and resources in other languages

Geriatric Education Series

The Aging Brain: Signs & Symptoms of Cognitive Impairment

Tuesday, November 16, 2021 | 8:05-9:05am

Presented by:

John Stoukides, MD, RPh

Director of Geriatrics, Roger Williams Medical Center; Medical Director, RI Mood & Memory Research Institute; Medical Director, Roger Williams Senior Health Care Associates

Cognitive Decline Isn't Inevitable.

According to the CDC, up to 40% of dementia cases may be prevented or delayed. There are lifestyle factors within one's control that change risk of developing dementia. Primary care professionals can play a critical role in the assessment and modification of these risk factors.

After completing this webinar, participants will be able to identify risk factors for cognitive decline and list methods to modify those risk factors.

CONTINUING EDUCATION

Nursing: This activity has been submitted to the Northeast Multistate Division (NEMSD) for approval. The Northeast Multistate Division is accredited as an Approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Social Work: This activity has been submitted to the Rhode Island College, School of Social Work for approval.

Share your experience with the Rhode Island Department of Health to help improve systems of care for children and youth with special health care needs.
