**Diagnostic Evaluation** 

| Code  | Service  | •  |                | Permissible<br>Diagnoses | Tips/Guidelines  | NHPRI/Optu<br>m | United/Optu<br>m | BCBSRI   | Tufts<br>Commercial | Medicare |
|-------|--|--|----------------|--------------------------|--|-----------------|------------------|--|---------------------|----------|
| 90791 | Psychiatric<br>diagnostic<br>evaluation<br>(without<br>Medical<br>Service) | doing a diagnostic<br>assessment, diagnostic<br>clarification, or a<br>biopsychosocial<br>assessment | concludes with | Psychiatric<br>diagnoses | A psychiatric diagnostic evaluation is an<br>integrated assessment that includes history,<br>mental status and recommendations. It may<br>include communicating with the family and<br>ordering further diagnostic studies. If a<br>person is not in need of mental health<br>services, other disposition information, such<br>as to whom the client was referred, shall be<br>included in the client file.<br>NOTE: 90792 is the code for Psychiatrist<br>and includes evaluation for medication.<br>NOTE: Generally this code cannot be billed<br>the same day as a psychotherapy code.<br>Medicare allows one 90791 every 6 months<br>per episode of care, but 2nd evaluation<br>within a year requires documentation of<br>medical necessity. NOTE: This code is<br>rarely used in IBH as it requires more time<br>and more documentation than is typical for<br>an IBH assessment. Do not use this code<br>unless you are sure you have a way to<br>document this information in the EHR and<br>have considered the implications of having<br>all of this information in the EHR.<br>NOTE: Although this is not a time-based<br>code, an evaluation of this kind generally<br>requires at least 45 minutes. |                 |                  | Yes<br>(Special Note for Pedi:<br>BCBSRI recognizes<br>that the eval of<br>child/adol often takes<br>longer than adults<br>and requires add'l<br>collateral contacts<br>that further<br>differentiate this<br>population. BCBSRI<br>allows providers to<br>file with a modifier<br>"TU" for extended<br>90791-psychiatric dx<br>eval > 75 minutes. |                     | Yes      |
