

You May Already Be Doing it: NCQA Behavioral Health Distinction

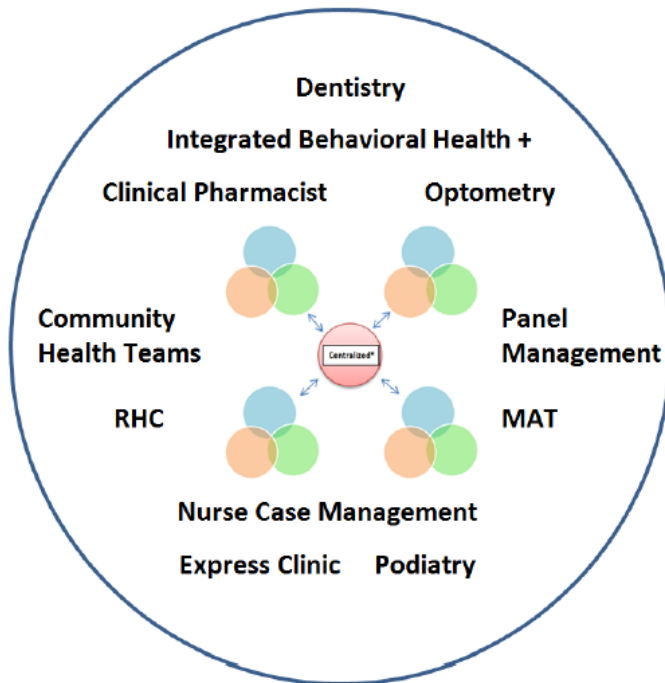

Nelly Burdette, PsyD, Director of Integrated Behavioral
Health

Denise Andrade, MBA, FACMPE, Senior Project Manager

PCHC Background

- * 8 primary care locations across Providence
- * 61,000 patients served with 210,000 visits last year
- * 70% Medicaid, 10% Commercial, 10% Medicare, 10% Uninsured
- * PCMH Recognition since 2014
- * Multi-specialty (OB-Gyn, Pediatrics, Family, Internal Medicine, Dental, Optometry, Podiatry, IBH, and Psychiatry)
- * 60% best-served in a language other than English

Birdseye View of PCHC Pop Health

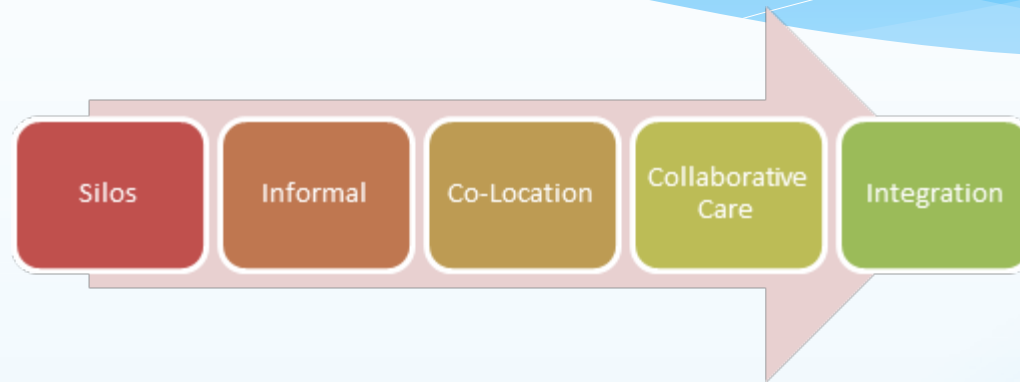

Core Population Health Services:

Integrated Behavioral Health
Nurse Care Management
Community Health Workers
Clinical Informatics

Additional Services In-House:

Reproductive Health Counselors /
Title X
Medication Assisted Treatment
Clinical Pharmacist
Pediatric and Adult Dentistry
Optometry
Podiatry

Integration in clinic will be critical

One of our core strategies has been **Integrated Behavioral Health**

- But not just **reacting** to the crisis at hand
- But **actively looking** for problems **before** they detonate

Behavioral Health Distinction Overview

When Can you Apply?

- Initial application of NCQA PCMH Recognition
- Added after PCMH recognition achieved

Note: Virtual Review may be done

- Annual Reporting

IBH DISTINCTION PRICING

Initial Recognition Fee

\$500 flat fee for each practice site

Not per clinician

Annual Reporting Fee

\$150 flat fee for each practice site

Behavioral Health Distinction Overview

- * **18 criteria:** 11 core and 7 elective
- * **Submit 13 criteria:** 11 core & 2 electives
- * **7 criteria** part of PCMH recognition:
4 core and 3 elective criteria

Behavioral Health Distinction Overview

MAIN CONCEPTS

- Behavioral Health Workforce –
Integrated behavioral health
Care team is trained to identify & address MH and SUD concerns
- Information Sharing
Able to share information
Integrated/coordinated treatment plan
- Evidence-Based Care & Protocols
- Measuring and Monitoring –Utilizes quality measures to monitor care

IBH Competencies & Criteria

COMPETENCY	CORE CRITERIA	ELECTIVE CRITERIA
Behavioral Health Workforce	4	2
Integrated Information Sharing	1	3
Evidence Based Care	4	0
Measuring and Monitoring	2	2
TOTAL	11	7 (Choose 2)

***PCMH 2017 CORE CRITERIA**

Documentation Submitted Core Criteria

- * BH 01 : **BH CARE MANAGER** - Job Descriptions, staff list
- * BH 03: **BH CLINICIAN** - Name/Title of clinician & brief intervention protocols
- * BH 05: **REFERRAL EXPECTATIONS** - Referral agreement or documented process
- * BH 06: **REFERRAL RELATIONSHIP** - Agreement for ad hoc consult or internal process
- * BH 07: **REFERRAL TRACKING/MONITORING** – Documented Process & Evidence
- * BH 11: **DEPRESSION SCREENING** – Documented Process, Report, evidence
- * BH 12: **2 BH SCREENINGS** – Documented Process, Report, evidence
- * BH 13: **CDS for MH Condition** – evidence – alerts, order sets, templates, dx support
- * BH 14: **CDS for SUD Condition** –evidence – alerts, order sets, templates, dx support
- * BH 15: **MONITORING & ADJUSTING TREATMENT** – flowcharts & notes or referral
- * BH 17: **2 BH CLINICAL MEASURES** – HEDIS, ECQMS

Competency A: Behavioral Health Workforce

The practice incorporates behavioral health providers at the site, utilizes behavioral health providers outside the practice and trains the care team to address the mental health and substance use concerns of patients.

BH 01 (Core) Behavioral Health Care Manager: Has at least one care manager qualified to identify and coordinate behavioral health needs.

The practice identifies the behavioral health care manager and provides qualifications. The care manager has the training to support behavioral health needs in the primary care office and coordinates referrals to specialty behavioral health services outside the practice.

SAME AS TCo8

Identified BH manager

Submitted:

Job Descriptions:

- Director
- BH clinician
- BH Community Health Worker

Staff List by site

BH 03 (Core) Behavioral Health Clinician in the Practice: Has at least one clinician located in the practice who can directly provide brief interventions on an urgent basis for patients identified with a behavioral health condition.

A clinician within the practice has the training to provide brief interventions based on evidence-based guidelines.

- Integrated into practice workflow and accessible when needed.
- Simple co-location does not meet the requirement
- Telehealth capabilities would meet this criterion.

The evidence identifies the name/title and qualifications of clinician(s) responsible for the brief intervention and describes how staff access the services when needed.

Evidence of Implementation

Staff – Name & Title
(same list as BH01)

Documented process for accessing the clinician:

- warm hand off
- appointments
- telehealth

BH 05 (Core) Behavioral Health Referral Expectations: Works with behavioral healthcare providers to whom the practice frequently refers, to set expectations for information sharing and patient care.

REFERRALS FOR TREATMENT

Established relationships with behavioral healthcare providers (formal or informal agreements)

Outlines expectations for exchange of information (frequency, timeliness, content)

*A notification of legal inability to receive a report that includes confirmation of a BH visit meets the content requirement.

-Agreement needed if sharing facility/campus with BH professionals but has separate systems

-The practice may present existing internal processes if there is partial integration of behavioral healthcare services.

Same as PCMH CC 09

Documented process & Evidence of Implementation

OR

Agreement

Submitted:

-Agreements

-Summary of our integration and each referral relationship

-Shareable if the same for all sites

BH 06 (Core) Behavioral Health Referral Relationship: Has a formal agreement/consultative relationship with a licensed behavioral health provider or practice group that acts as a resource for patient treatment, referral guidance and medication management

AD HOC ACCESS FOR CONSULTATION

At least one formal agreement with a BH specialist/group for *non-visit consultation* (referral guidance/ med mgmt)

Agreement : Includes arrangements and availability of the BH specialist/group for ad hoc discussions

These non-visit consultations give PCP advice on how to address patient behavioral health needs (if referral needed, community resources, dosage advice, patient safety issues).

Documented process &
Evidence of Implementation
OR
Agreement

Submitted:
Documented Process
(summary of warm hand off)
Warm Hand off Report
(one report for all sites)

“Right care, at the right time, in the right place.”

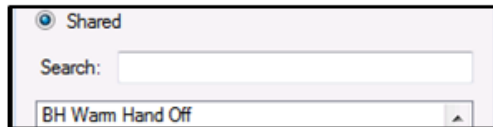

BH 06 (Core) Documented Process Documentation in EMR of Warm Hand off

Warm Hand offs are used for immediate consult with the behavioral health clinician and documented in the EMR.

Behavioral Health Warm Hand Off:

For the Behavioral Health staff to document a warm hand off from a provider, which can be tracked for reporting, the BH worker will need to pull the following favorite into the note.

- Open an encounter note for the patient
- Click on Favorites  Favorites
- Load the Shared favorite "BH Warm Hand Off"

Shared
Search:
BH Warm Hand Off

DISCUSSED

- Warm hand off: Met with pt briefly to introduce Integrated Behavioral Health (IBH) Services and explain role of IBH provider. Pt encouraged to call on same day for appointment or pre-book as convenient

This favorite includes a tracking Medcin(ID1000228) which can be tracked on the reporting end of Intergy.

Competency B: Information Sharing

The practice shares patient information within and outside the practice to support an integrated/coordinated patient treatment plan.

BH 07 (Core) Behavioral Health Referrals Tracking and Monitoring: Tracks referrals to behavioral health specialists and has a process to monitor the timeliness and quality of the referral response.

A tracking report showing date of referral and expected timing for receiving information

If the specialist does not send a report, the practice contacts the specialist's office and documents its effort to retrieve the report in a log or an electronic system.

The practice bases its definition of "timely" on patient need.

ALIGNS WITH CC11

Documented process &
Evidence of Implementation

Submitted:
Documented Process
(internal & external referrals)
Referral policy
Referral tracking report

DOCUMENTED PROCESS REFERRALS

Creation of Referrals

Internal IBH referrals: Follow IBH protocol

External Referrals:

1. Provider determines need for referral to an outside specialist and completes referral in EMR
2. Priority is determined
 - a) High Risk Referrals (HRR) (Priority 1) – tasked to the Referral Coordinator or nurse for processing within 1 business day
Assign Due Date: Appointment within 1 week
 - b) Routine Referrals (REF) (Priority 2 & 3) – tasked to the Referral Coordinator for processing within 2 business days
Due Date: Appointment within 4 weeks

DOCUMENTED PROCESS REFERRAL FOLLOW UP

Tracking Report – Weekly list of open referrals

Referral Coordinator will review list and check the chart for information

- Contact the patient and/or specialty practice to determine if care was provided
- Continue to work open referral every 30 days and sends monthly task to the referring provider regarding the referral status
- Close referral after receipt of information or document the reason why referral not completed (unable to reach patient, patient did not show for appointment, patient did not make appointment, unable to procure referral from insurance)

Competency C: Evidence-Based Care

The practice uses evidence-based protocols to identify and address the behavioral health needs of patients

BH 11 (Core) Depression Screening: Conducts depression screenings for adults and adolescents using a standardized tool.

- The documented process includes screening process and approach to follow-up for positive screens.
- Screens patients at age 12+
- Reports the screening rate (N/D) and identifies the standardized screening tool
- Uses a standardized tool using current, evidence-based approach (PHQ) endorsed by national or regional organization

BH 12 Behavioral Health Screenings Documented Process

Done Yearly and as needed

Health Reminders have been created to help track with CAGE-AID and GAD7 screening.

If the screening needs to be performed, the Health Reminder will display “Due”

The reminders are set yearly and will begin to appear 2 months before they are due
The Health Reminders will continue to display Due until the following is satisfied.

GAD7 – satisfied if the patient scores below 10 and the user selects one of the following:

3-9 Mild Symptoms

0-2 No Significant Symptoms

CAGE-AID Screening will be satisfied if the patient scores a 0.

o CAGE AID Screening result is negative

Behavioral Health Screening: CAGE-AID Documented Process

Documenting the CAGE-AID:

- Ask each question and document the value on the right **1** (positive) or **0** (negative).
- Add the numerical values and enter the score in the **CAGE-AID score** box.
- Using the selection on the Left, **0, 1-4** document the range the score falls into.
- For a score 1 or higher, further evaluation is needed.
- If this is a rescreening, document the following: Y Is this a rescreening?

Form: **HCA / CLINIC TEAM** Auto Neg Uncheck All

BH 13 (Core) Evidence Based Decision Support— One Mental Health Condition

BH 14 (Core) Evidence Based Decision Support— One Substance Use Disorder

Uses clinical decision support following evidence-based guidelines

Mental Health Conditions:

Depression, anxiety, bipolar disorder, ADHD, ADD, dementia, Alzheimer's

Substance Use Disorders:

Illegal drug use, Rx drug addiction, alcoholism

CDS is a systematic method of prompting clinicians to consider evidence-based guidelines at the point of care.

CDS encompasses a variety of tools, including, but not limited to:

- Computerized alerts and reminders for providers and patients.
- Condition-specific order sets.
- Focused patient data reports and summaries.
- Documentation templates.
- Diagnostic support.
- Contextually relevant reference information

BH 13 & BH 14

Evidence-Based Decision /CDS

Evidence of Implementation

- ❖ Identify any protocols, standing orders, EMR tools
- ❖ Used screen shots and “walk through” narrative explanations for tools/processes:
 - 1. Diagnosis of depression** – Documentation of PHQ9, treatment plan
Copy of Colorado Clinical Guidelines Collaborative (Healthteam works) Depression in Adults: Diagnosis & Treatment Guidelines
 - 2. Predictive Order Management (POM)** – EMR allows clinician to see medications & orders done by other clinicians for same diagnosis

BH 13 & BH 14

Evidence-Based Decision /CDS

Evidence of Implementation

3. **Health reminders** - rescreening using PHQ9
4. **Reference Information access:** Screenshots of Medline access in EMR & Up-to-Date quick link on PCHC intranet
5. **Diagnostic Support:** Computerized Physician Order Entry (CPOE) Formulary check, drug to drug interaction, drug allergy warnings
6. **Templates:** Adult and child templates for initial and follow up behavioral health visits & MAT templates
7. **Intelligent Prompt (IP)** is searchable by diagnosis/condition provides clinical prompts for options for history, ROS, PE, testing, diagnosis, treatment

Competency D: Measuring and Monitoring

BH 15 (Core) Monitor and Adjust—Mental Health or Substance Use Disorder:
Monitors and assesses symptoms over time for patients identified with a mental health or substance use condition

adjusts the treatment plan for patients who do not demonstrate improvement

The practice provides a report demonstrating routine monitoring of patients screened and actions taken when they are not getting better for either mental health or substance use.

Tools to consider for monitoring of symptoms are the PHQ-9 for depression or the AUDIT for alcohol use.
