

ADVANCING INTEGRATED HEALTHCARE

Advancing Team Based Telehealth in RI Webinar Series:

Rhode Island Telehealth Sustainability Strategies – Telehealth Workflow and Etiquette“

Care Transformation Collaborative of R.I.

FEBRUARY 23, 2021

What we learned from Practice Assessment & Patient Surveys

UnitedHealthcare Telehealth Project:

46 Practices completed Practice Assessment; Over 900 Patient Surveys

Top 4 things to improve telehealth: patient education, better workflows, improved internet in community, staff training

Top topics for webinars: # 3 Technology/training for patients, #4 Integration into EHR, #5 Patient Engagement

Patient feedback on how to improve telehealth visits:

- “Calling a day before to remind me of appointment” ; “...appt. scheduled via patient portal”
- “Conversation prior to visit thru website to discuss issue(s) before visit so we can "get down to business" during telemedicine visit.”
- “Actually, I thought this was best way to speak to my provider as I did not know what was wrong with me; I was worried I would infect others...I would have ended up in ER or Urgent Care Ctr.”

Presenters:

Lisa Denny, MD | **Barrington Family Medicine**

Marna Heck-Jones, Kristi Lombardo, LMHC &
Robyn Ostapow, PA | **Anchor Medical**

(Moderator) Reid Plimpton MPH, Project Manager |
Northeast Telehealth Resource Center (NETRC)

Telehealth Workflow & Etiquette

“Telehealth Workflow” - a practice’s process for setting up/managing telehealth appointments may include:

- Staff training/assignment of tasks
- Scheduling patient visit (ensuring equal access to telehealth visits)
- Pre-visit planning; Preparing the patient; “Virtual visit set-up”
- Provider conducts visit with Patient
- Closure of visit; Billing/Coding & Legal considerations

“Telehealth Etiquette” – considerations to ensure professional standards are maintained in virtual visits:

- Environment
- Equipment
- Communication
- Dress

Why Strategic Design Matters in Telehealth

Telehealth Vision

- Where You Want To Go
- Direction On How To Get There

Strategic Alignment Across Org

- Digital Health Strategy
- Payment Options (other states?)

Leadership Buy-in

- Multiple CEOs & Leaders
- Unique Physician Relationships
- Competing Internal Initiatives

Clear Communication

- Internal Marketing
- External Marketing

Focus on Specific Clinical Issues

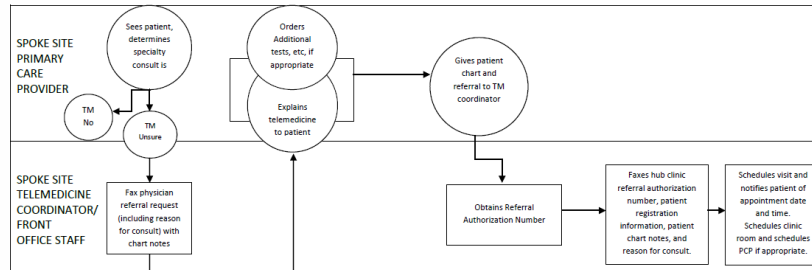

- Access to Care
- Program Expansion

Success Metrics

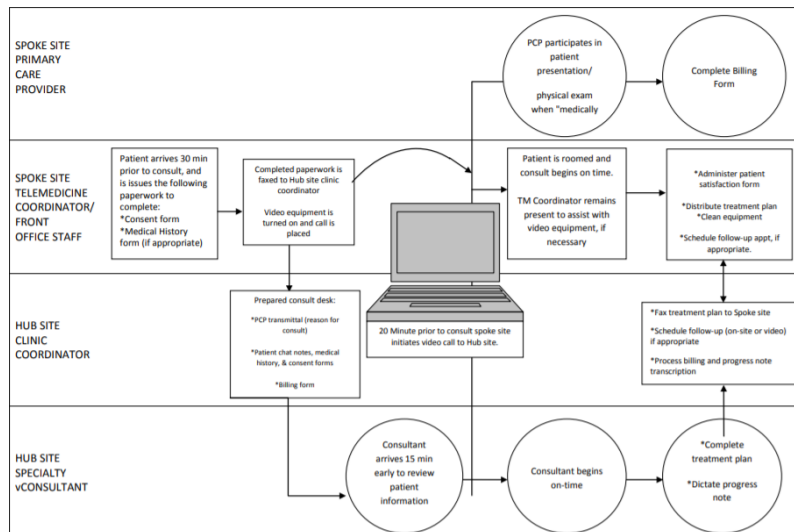

- Consistent Criteria
- Comparable Data

Workflows, Strategic Planning, and More!

PRIOR TO CONSULT

DAY OF CONSULT

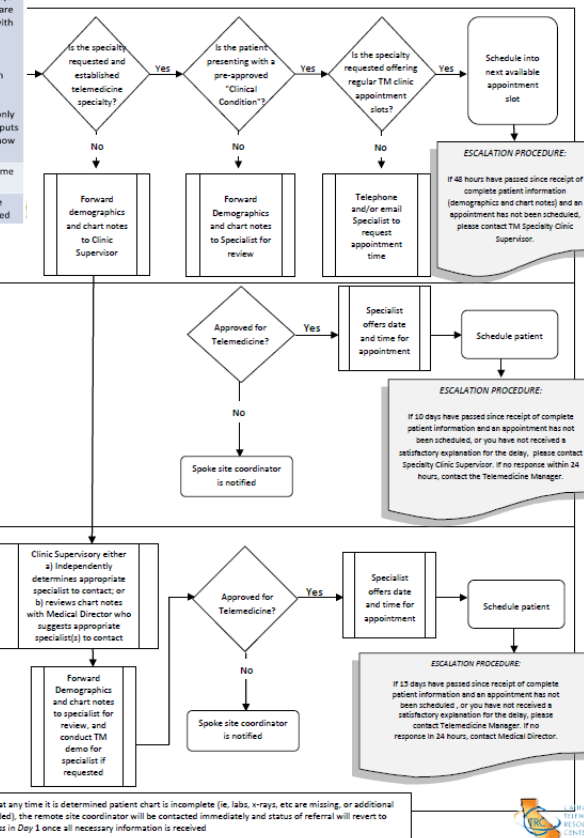

Advantages and disadvantages of the most common contracting models

Model	Advantage	Disadvantage
Originating site purchases blocks of time from distant site	<p>Originating Site: Guaranteed access to specialist</p> <p>Distant Site: Guaranteed payment for time reserved</p>	<p>Originating Site: Risk assumed for no-show patients</p>
Originating site pays per patient seen	<p>Originating Site: No pressure to fill blocks of time</p>	<p>Originating Site: Possible excessive wait time for appointment</p> <p>Distant Site: Difficult to forecast volume to plan for coverage. AND Assume risk for no-show patients</p>
Originating site pays the delta between distant site's cost and collections	<p>Originating Site: Only pays a portion of the specialty visit cost</p> <p>Originating Site: Most sustainable model as the originating site no longer has to pay for specialty care</p>	<p>Distant Site: Assumes the administrative cost & burden of billing patient insurance & balance billing originating site</p> <p>Originating Site:</p> <ul style="list-style-type: none"> Initial start-up delays in as health plans are slow to contract with new providers. Limited to those providers offered through the health plan <p>Distant Site: Health plans will only pay by the patient seen, which puts the Distant Site at risk for no-show patients.</p>
Health Plan contracts directly with specialty service provider	<p>Distant Site: Contracting with a health plan allows the specialty group to expand access to multiple sites, thereby increasing service volume</p>	<p>Originating Site: May pay for time that's not utilized</p> <p>Distant Site: May provide more services than originally estimated</p>
On-demand, 24/7 coverage (hospital ED, ICU & In-patient)	<p>Originating Site: Guaranteed access and coverage when needed</p> <p>Distant Site: Guaranteed payment for time reserved</p>

When you redesign a practice around these principles, you can step off the productivity treadmill and focus on excellent patient care.

L. Gordon Moore, MD, and John H. Wasson, MD

Fam Pract Manag. 2007 Sep;14(8):20-24.

ADVANCING INTEGRATED HEALTHCARE

IDEAL MEDICAL PRACTICES

Care is driven by the patient's needs, goals and values.

Access is 24–7.

The care team uses technology to its fullest (e.g., electronic health records, e-mail, Internet scheduling).

Patients can see their own physician whenever they choose.

The majority of the office visit is spent with the physician.

Overhead is low.

Patients are seen the same day they call the office.

Physicians are able to see fewer patients per day.

Practices measure themselves regularly.

Practices are proactive in their care of patients with chronic illnesses.

Physicians are satisfied and feel in control.

TYPICAL PRACTICES

Care is driven by the practice's priorities.

Access is 9–5.

The care team avoids new technology.

Patients must see whoever is available.

The majority of the office visit is spent waiting.

Overhead is high.

Patients typically wait for an appointment.

Physicians must generate high numbers of visits per day to cover overhead.

Practices have little or no performance data.

Practices are reactive in their care of patients with chronic illnesses.

Physicians feel harried and overbooked.

A different kind of medicine

Barrington Family Medicine practice is small on overhead and big on personal care

BY JOAN D. WARREN
jwarren@eastbaynewspapers.com

Barrington now has an alternative when it comes to health care options with the recent opening of Barrington Family Medicine on Bay Spring Avenue.

The practice takes a new approach to practicing medicine known as a micro practice, which offers a more personalized doctor-patient relationship than most other practices in the United States today. There are a handful of micro practices in Rhode Island, but Barrington Family Medicine is the first of its kind in the Bay.

Physicians, Sarah, M.D., and Dr. Lisa Denny, M.D., both Barrington residents. They provide primary care for all ages — from newborns to the elderly.

Affiliated with Health Access RI, the office is staffed entirely by the two doctors, there are no receptionists, nurses, or billing administrators, therefore overhead is low.

"Without any other staff, we minimize barriers between physician and patient. The idea is to reevaluate the whole process, streamline it and lower overhead," Dr. Arena said.

The physicians depend on computer technology in the form of Clinical Works, a program that manages everything from patient profiles, billing, scheduling and ordering prescriptions. Keeping files electronically cuts down on paperwork and virtually eliminates paper files. The doctors say it also eliminates errors as well, especially when ordering prescriptions.

"At times, a pharmacist might not properly read a prescription written by a physician. This program eliminates that issue," Dr. Denny said.

When a new patient comes in, their picture is taken and put in an electric file. This way, when a patient calls or e-mails the office, the doctor's can pull up their file and put a face to a name. Patients are also encouraged to make appointments on-line and can have a "virtual care" appointment, eliminating the need to come to the office.

Both Dr. Arena and Dr. Denny are mothers of small children and know how difficult it can be to make time for doctor's appointments.

CHRISTINE HOCKEPPLE

Dr. Lisa Denny checks out a recurring rash on 5-year-old Slade Crane during a house call on Wednesday, Feb. 5. Dr. Denny is one of two doctors at Barrington Family Medicine, a new practice that offers people with no health insurance comprehensive primary care for a nominal fee.

Barrington micro practice is one of seven involved in Health Access RI

Health Access RI is a network of doctors offering people with no health insurance a way to have comprehensive primary care for a nominal fee: \$25-\$30 per month. Beyond the monthly fee is an office visit fee, usually \$5 or \$10. Many practices also offer discounts for multiple family members and also for automatic monthly credit card payments. Here's some more information about the program:

- **Doctors:** There are seven practices with a total of 21 family-medicine doctors, including Barrington Family Medical on Bay Spring Avenue.
- **What you get:** 24-hour tele-yearly physicals
- **Cost:** Varies by practice but usually consists of a one-time enrollment fee of \$15 to \$80, monthly fee of \$25 or \$30, and office visit fees of \$5 or \$10.
- **Counted lab work, image scans (MRI) and physical therapy with our participating Health Access RI service affiliates: East Side Lab, XRA Medical Imaging and Rhode Island Rehabilitation.**

School board cuts four programs, four positions

All-day kindergarten, Hampden Meadows "pull-out" enrichment among cuts

BY TOM KILLIN DALGLISH
tdalgish@eastbaynewspapers.com

Last Thursday night, the Barrington School Committee unanimously approved staff and program cuts.

ON PAGE 12: The Barrington School Committee last Thursday night approved cuts to the all-day kindergarten program, Hampden Meadows "pull-out" enrichment, and four teaching positions.

Teachers Dr. Robert G. Adams will result in the elimination of four full-time equivalent teaching positions across among the middle schools, Hampden Meadows, Primrose Hill, and Sowams. Four program areas will be affected by the cuts.

One is the all-day kindergarten program (known as "all-day K") in the three elementary schools —

See CUTS Page 10

Closer look at the cuts

■ **All-day kindergarten:** The program is run out of all three elementary schools — Nayatt, Primrose Hill, and Sowams. The cut will impact approximately 40 students. Savings are estimated at \$102,600.

■ **"Pull-out" enrichment:** Located at Hampden Meadows School, it is operated during the regular school day (not as part of the after-school enrichment program). Cut will impact approximately 40 students. Savings are estimated at \$82,977.

■ **Math specialist:** Located at the middle school, the half-time position will be eliminated. The specialist provides instructional assistance per grade, two from each cluster who are deemed to be having the greatest difficulties with math.

■ **Music teacher:** The full-time position being eliminated is at the middle school. Cut will impact approximately 65 students. Savings from this cut combined with the elimination of the math specialist are estimated at \$111,247.

Rhode Island's New Law Requires Health Plans Cover Telemedicine Services

19 July 2016 | Health Care Law Today | Blog

Authors: Thomas B. Ferrante, Nathaniel M. Lacktman

Rhode Island marks the 31st state to enact a telemedicine commercial reimbursement statute. The [Telemedicine Coverage Act](#) (HB 7160B) was signed into law by Rhode Island Governor Gina Raimondo on June 28, 2016, representing a forward step for telehealth providers in a state that historically has held one of the lowest-rankings in the nation for telehealth coverage policy. The new law requires commercial health insurers in the Ocean State to cover treatment provided via telemedicine to the same extent the services are covered via in-person care. The law takes effect January 1, 2018 and applies to all policies delivered, issued, or reissued in the State after that date.

The law states as follows:

“ Each health insurer that issues individual or group accident and sickness insurance policies for health care services and/or provides a health care plan for health care services shall provide coverage for the cost of such covered health care services provided through telemedicine services. R.I. Gen. Laws §27-81-4(a).

Welcome!

I will start the video call in a moment.

Informed consent: You are agreeing to use telemedicine technology for this visit. The laws that protect privacy and the confidentiality of medical information also apply to telemedicine. You have other option available to you (in-person visits, telephone visits) and are not required to use this technology. Telemedicine visits are considered office visits with Dr. Denny; your insurance will be billed as usual for these visits (although copays and/or deductibles may be waived by your insurance provider). This software is HIPAA compliant (secure to industry standards). As with all technology, glitches and interruptions may occur during your visit. Thank you for engaging in social distancing by using telemedicine today.

EXAM

Physical Exam

Constitutional:

Appearance: Normal appearance. She is well-developed.

Comments: **Comfortable appearing female, speaking via video from home**

HENT:

Head: Normocephalic and atraumatic.
